PROFILE SUMMARY

Third-year Software Engineering undergraduate at the University of Kelaniya with a strong passion for fullstack development. Skilled in developing innovative, real-world solutions through modern tech stacks. Eager to contribute to impactful projects, thrive in collaborative environments, and continuously grow as a developer and team player.

SKILLS

Languages: JavaScript, TypeScript, Java, C, HTML/CSS

Backend : Node.js, Express.js, Spring Boot, Spring Cloud

Frontend : React.js, Next.js, Tailwind CSS

Databases : MySQL, MongoDB Atlas

Tools : Git, Docker, Prometheus, Figma

PROJECTS

Gift Lovers E-Commerce Platform (Individual) | *MERN, Tailwind CSS, JWT* | [GitHub](#) May 15, 2026 – Present

- Developed a full-stack eCommerce web application using the MERN stack to facilitate seamless online shopping and inventory management.
- Developed Backend Feature-based architecture.
- Implemented robust user-facing features including product search/filtering, order tracking, and a secure administrative dashboard.
- Architected secure user authentication flow using JWT, PayPal for secure payments, and managed image assets utilizing Supabase.
- **Keywords:** eCommerce, Authentication, Admin Dashboard, Payments
- **Technologies:** MERN, Tailwind CSS, JWT

Bookfair Reservation System (Group) | *Spring Boot, React MUI, JWT* | [GitHub](#) Feb. 11, 2026 – Present

- Collaborated to build a comprehensive Bookfair reservation system leveraging a Spring Boot backend and React frontend.

- Developed core functionalities such as product search/filtering, stall booking management, and dynamic QR code generation.
- Secured the application via JWT-based authentication and processed user transactions seamlessly through PayPal integration.
- **Keywords:** eCommerce, Authentication, Admin Dashboard, Payments, QR Generate
- **Technologies:** Spring Boot, React MUI, JWT, PayPal API

Microservice backend(Individual Ongoing) | *SpringBoot, Spring Cloud, Kafka* | [GitHub](#) May 20, 2026 – Present

- Developed a scalable backend e-commerce architecture using Java and Spring Boot, comprising independent microservices for order processing, inventory management, and product cataloging.
- Architected a distributed microservices ecosystem utilizing Spring Cloud Gateway for centralized API routing and Netflix Eureka for dynamic service discovery.
- Implemented asynchronous, event-driven communication between services using Apache Kafka to ensure high availability and loose coupling.
- Integrated secure API endpoints using Spring Security with OAuth2, and implemented comprehensive system monitoring via Spring Boot Actuator and Micrometer Prometheus.
- **Keywords:** Microservices, Event-Driven Architecture, Service Discovery, API Gateway, Distributed Systems
- **Technologies:** Java, Spring Boot, Spring Cloud (Eureka Gateway), Apache Kafka, MySQL, OAuth2, Prometheus

EDUCATION

University of Kelaniya

2024 – Present

BSc in Software Engineering (Hons)

Colombo, Sri Lanka

- Specializing in Net-Centric Applications, Data Science and Engineering Applications and Health Informatic Applications domains.
